

## Smart Card Chip Operating System Platform

### ◆ Proprietary

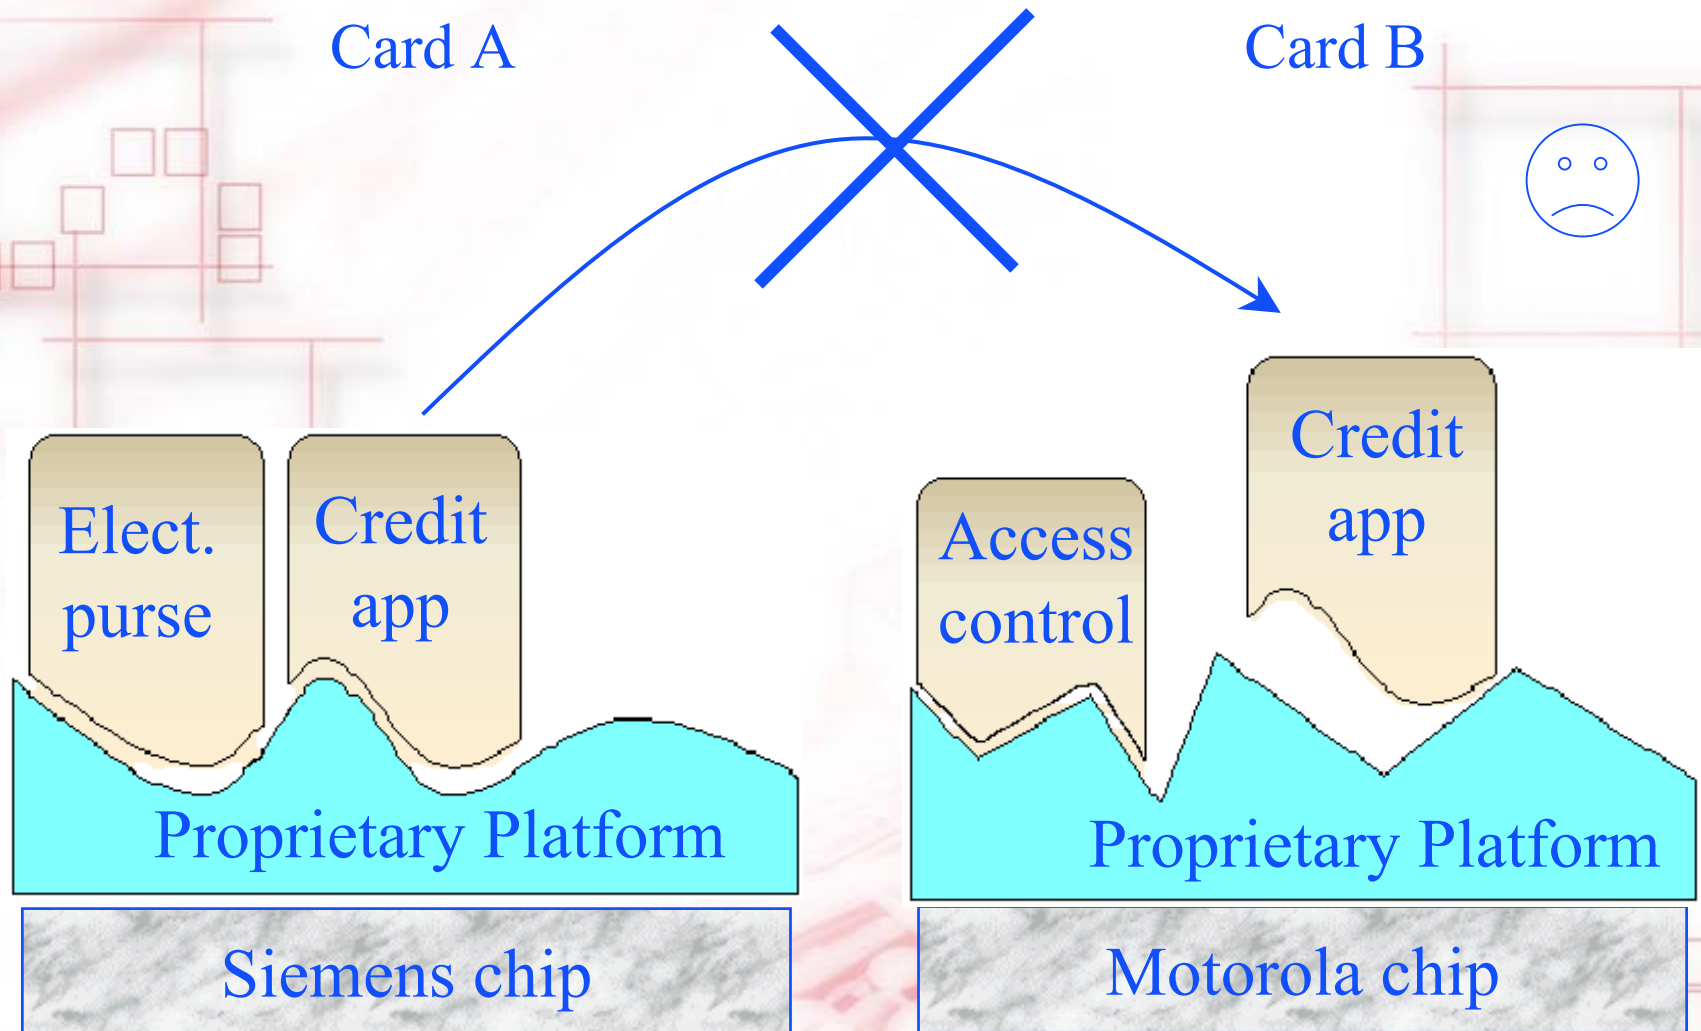

- ☞ Non portable across different vendors
- ☞ Not open to outsiders
- ☞ Single source

### ◆ Open

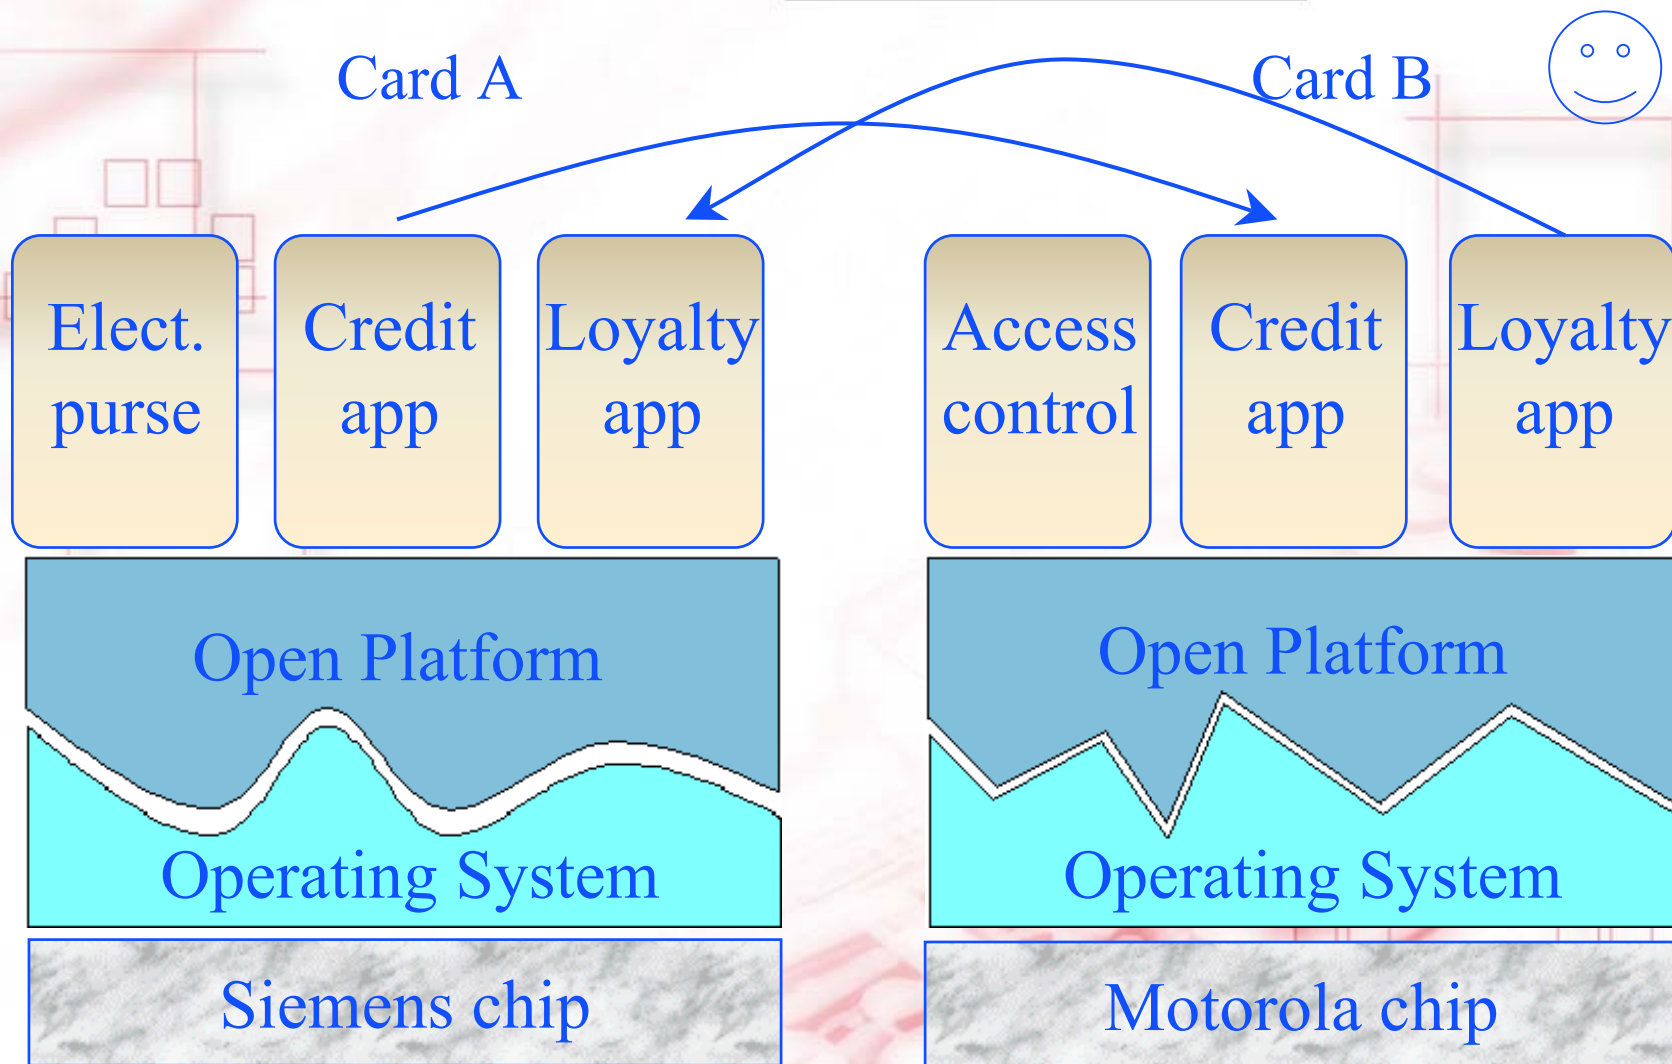

- ☞ Multos card
- ☞ Java card
- ☞ Windows for Smart Card

## Non-Portable Application On Proprietary Platform

## Portable Application On Open Platform

## Multos Card

- ◆ MULTi-application OS developed by Mondex and MasterCard
- ◆ Rely on the Multos API
- ◆ ITSEC E6 certified firewalls for card application segregation
- ◆ Extremely secure smart card
- ◆ Internal structure is similar to Java card

## Multos Card (cont.)

## Multos Card (cont.)

- ◆ Uses dedicated programming language, Multos Executable Language (MEL)
- ◆ Can develop using C and then convert to MEL
- ◆ Java cardlet can also be run on Multos card

## Java Card

- Object Oriented Language
- Syntax similar to "C" and "C++"
- Interpreted language

"app.java"

Source File

Compilation

"app.class"

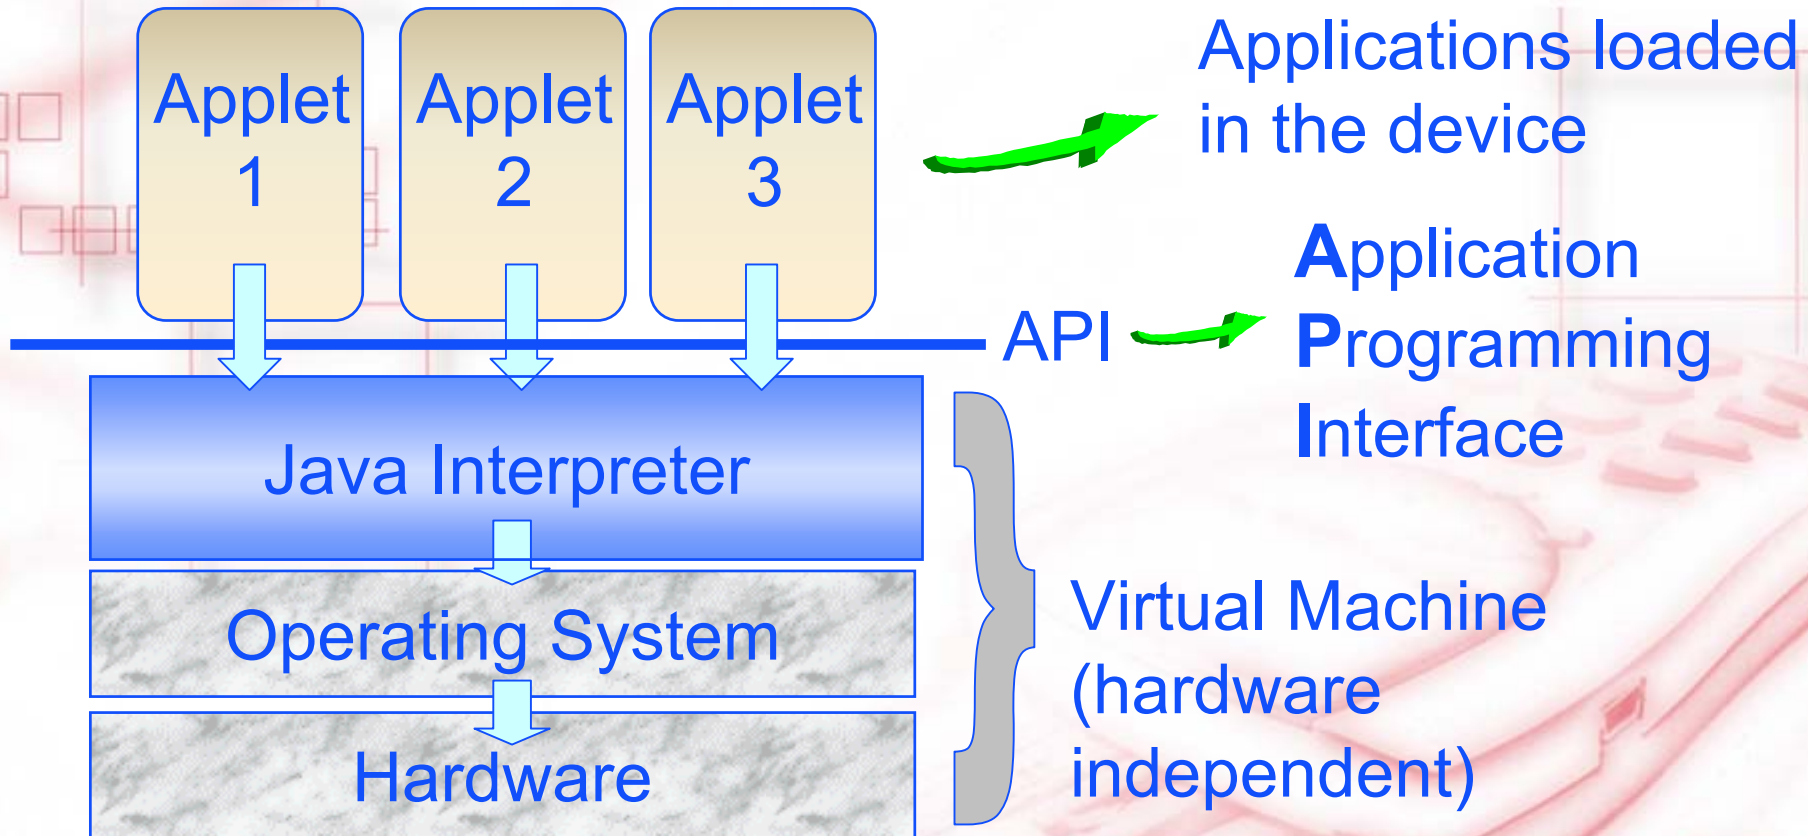

... BCFD876543FCDE  
76FD45EC76890FD  
FDABAA453BCDEA  
CBDE7654CDAB78 ...

} byte-code  
Loading

- Byte-code verification
- Execution

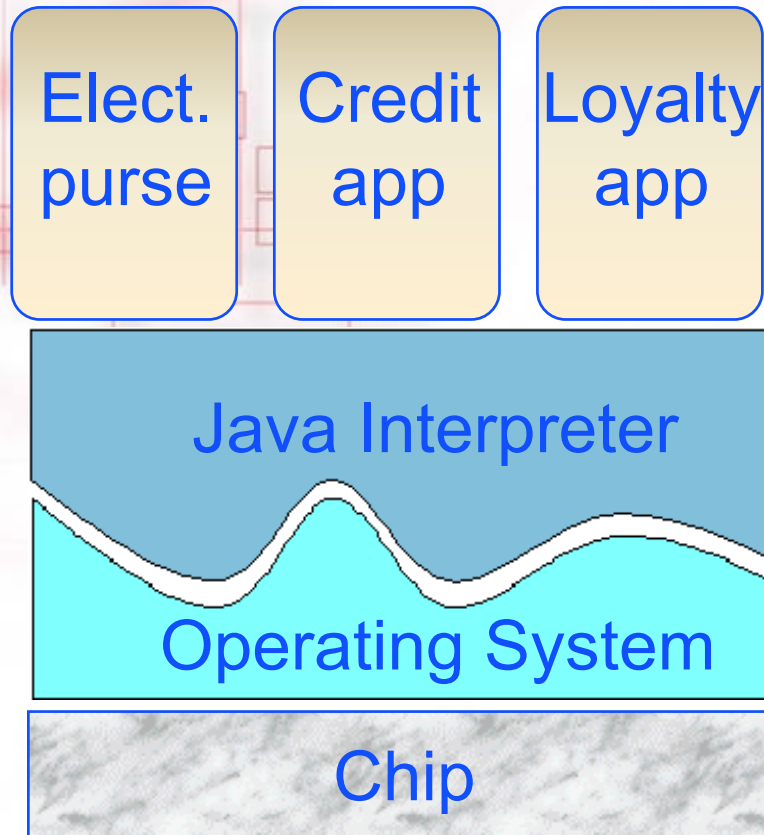

## Java Card (cont.)

## What is Java Card API

### Java Card API

(Application Programming Interface)

- The API defines a library of classes
- A class is an association of:
  - methods (functions)
  - fields (data)
- A Java card application is written by “calling” a set of Java card classes

## Visa Open Platform Card

## Visa Open Platform Card

### ◆ Key features

- ☞ Compliant card used by financial industry
- ☞ With VisaCash, E-purse Cardlet defined and preloaded
- ☞ Dynamic post-issuance loading of Applications

## Visa Open Platform Card

## Visa Open Platform Card

- ➡ Portability of Applications across chip-cards
- ➡ Standardization of Personalization
- ➡ Backward compatibility with existing terminals & systems

## Visa Open Platform Card

- **Java Card 2.1 :**  
specify the basic API

Note:  
Visa Open Platform is **optional**.  
VOP 2.0 standardize the loading  
mechanism for all vendors.

## Windows Smart Card

- ◆ Proposed by Microsoft in Oct 27<sup>th</sup> 1998, released in Nov 15<sup>th</sup> 1999
- ◆ Multi-application OS using 8K ROM
- ◆ Low-cost
- ◆ Easy to program using VB on NT or Win 2K
- ◆ Cardlet can be downloaded to the card

## Smart Card For Windows

## Windows Smart Card

### ◆ Secure operating system

- ☞ Control of a FAT file system with Access Controls Rule
- ☞ On-card Win32 API,
- ☞ Language-neutral virtual machine and popular cryptos

### ◆ Rapid application development tools

- ☞ Support Visual Studio
- ☞ With PC simulator

## Windows Smart Card

### ◆ Application used

- ☞ Secure network authentication
- ☞ Secure corporate transactions
- ☞ Health-care information
- ☞ Electronic cash
- ☞ Customer loyalty programs

## PC/SC Standard

◆ Formed in May 1996 in partnership with major PC and smart card companies

- ☞ Groupe Bull
- ☞ Hewlett-Packard
- ☞ Microsoft
- ☞ Schlumberger
- ☞ Siemens Nixdorf

## PC/SC Standard

- ◆ Ensure compatible communications between all types of smart cards
- ◆ Standard model for interfacing smart card readers and cards with PCs
- ◆ Device-independent APIs for enabling smart card aware applications
